## 1 Introduction

The Employee API in Lifecare Exchange Services provides services that make it possible to import and export personnel employments. The services in the Employee API are accessed via URIs.

This document describes following:

- Which information that a user can import and export via the Employee API.
- How the employee information is divided into entities and how these entities are structured.

### 1.1 Prerequisites

Before you can get access to the Employee API you must request a license key from Tieto. You should have basic knowledge on Swedish school system and W3C XML before you start using the API.

## 2 Supported school types

The table below describes the supported types of school.

School type	Description	Code
Pedagogical care	Childcare groups for children between 1-12 years	PC
Preschool	Childcare for children between 1-6 years	FS
Leisure time centre	Childcare for school-aged children over 6 years	F
Preschool class	Preschool class for children 6 years of age	FK
Compulsory School	Primary school for younger students	GR
Compulsory School For Learning Disabilities	Compulsory school for learning disabilities	S
Upper Secondary School	Secondary school. 3-4 years education	GY
Upper Secondary School For Learning Disabilities	Secondary school for learning disabilities	GS
Swedish For Immigrants School	Swedish for immigrants school	SF
Adult School For Learning Disabilities	School for adults with learning disabilities	SV
Municipal Adult School	Municipality school for adults	KV
Higher Vocational Education	Higher vocational education	YH

### 3 Domain model

The diagram below describes how the information is divided into entities and how these entities are structured.

### 4 Entities

#### 4.1 Employee

Name	Description	Read-only
id	GUID for the employee	Yes
personid	Person id for the employee	Yes
firstname	First name	Yes
lastname	Last name	Yes
privacy	The person has restrictions. This is enumerated as None, Level1. Level1 means privacy highlighted by the "Skatteverket".	Yes
employment	Employment	Yes

#### 4.2 Employment

Name	Description	Read-only
start	Start date for the employment	Yes
end	End date for the employment	Yes
signature	Signature	Yes
email	Email	Yes
phone	Phone number	Yes

### 4.3 Unit

## 5 Services

All services are based on HTTP REST technology and organized in school types to match each school structure. "Update services" are using the method HTTP POST and "Get services" are using the method HTTP GET.

### 5.1 Export

The services below give employees at a specified date interval. The output is XML information with employees.

Base path for services are: [https://\[host\]/WE.Education.Integration.Host/LES/Employee/V1/Employee.svc](https://[host]/WE.Education.Integration.Host/LES/Employee/V1/Employee.svc)

Parameters – Alternative 1:

Parameter	Mandatory	Description
SearchDate	No	The search date. Current date will be used if SearchDate is not specified. The oldest search date that can be used is current date minus eight years.

Parameters – Alternative 2:

Parameter	Mandatory	Description
UnitId	Yes	Id for the school unit. Employees for all school units will be returned if UnitId is not specified.
SearchDate	No	The search date. Current date will be used if SearchDate is not specified. The oldest search date that can be used is current date minus eight years.

Services:

Service	Description
GetPedagogicalCareEmployees	Get employees for pedagogical care.
GetPreSchoolEmployees	Get employees for preschool.
