1 Introduction

The Outcome API in Lifecare Exchange Services provides services that make it possible to get and set the students outcome, i.e. grades and national tests. The services in the Outcome API are accessed via URIs.

This document describes following:

- Which grade and national test information that a user can get and set via the Outcome API.
- How the grade and national test information is divided into entities and how these entities are structured.

1.1 Prerequisites

Before you can get access to the Outcome API you must request a license key from Tieto. You should have basic knowledge on Swedish school system and W3C XML before you start using the API.
